-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 80-82 are rejected under 35 U.S.C. 102(e) as being anticipated by Fajardo et al (US 6,445,862).

Fajardo et al discloses a dispersion compensated photonic crystal fiber to which optical signal is coupled. As to claims 81-82, see lines 46-48 of column 1 and lines 52-53 of column 4. As to a tailored dispersion profile, see lines 27-35 of column 6.

Allowable Subject Matter

Claims 1-79 and 83-95 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

As to claims 1, 83-85, 94-95, the prior art fails to disclose or suggest the dielectric dispersion-tailoring region surrounded by the confinement region, which introduces one or more additional modes in the first range of frequencies that interact with the guided mode to produce the working mode.

As to claim 86 and 90, the prior art fails to disclose or suggest the additional dielectric layer positioned between the core and the first set of layers, wherein the thickness of the additional dielectric layer differs from that of each of any three consecutive layers in the first set of layers by more than 10%.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. West, Russell et al, Libori et al, and Weisberg et al disclose different types of photonic crystal fibers.

The prior art submitted by applicant has been considered. See attach copies of form PTO-1449.
